

Sounds Rite
Milwaukee, WI, USA

Acoustic Technician

401K with Company Match, Medical, Dental, Vision, Life, Paid Time Off, HSA

Full-Time, On-Site

This position involves time in the office and in the field

Are you ready to help grow an innovative new company through your passion for sound?

Sounds Rite is looking for an experienced Acoustic Technician. In this role you will be responsible for meeting with clients, researching and designing acoustic solutions and managing project performance. This role includes performing acoustic testing & calibration and reporting results to clients, troubleshooting paging systems and other audio equipment and addressing sound absorption needs. You will meet with clients and potential clients to determine how we can best solve their concerns. To ensure success in this role, you should understand the properties of sound and how it performs in the built environment and have a passion for learning.

Acoustic Technician Responsibilities:

- Meet with and educate clients and potential clients about the impact of sound in commercial and industrial environments and how we can best serve them
- Assess client needs and develop a basis of design and budget
- Read and understand architectural drawings and specifications
- Perform acoustic assessments of commercial spaces using specialized equipment
- Research products and work with manufacturers and vendors to ensure the viability of the system designs for new construction and retrofit of commercial spaces
- Prepare design of sound masking and/or absorption strategies for commercial and industrial spaces
- Commission sound masking, speaker and paging systems
- Troubleshoot systems
- Continually study and apply the current state of the art in the industry
- Provide oversight to team members and ensure successful system delivery
- Manage projects with an eye on budget/profitability
- Prepare acoustic reports for clients
- Maintain client relationships and establish new clients
- Assist in marketing and business development processes

Position Requirements:

- Foundational knowledge of audio processing and acoustics
- Ability to think creatively and design solutions for acoustic problems in commercial spaces
- Excellent troubleshooting skills
- Strong attention to detail
- Excellent customer service skills
- Must be able to communicate and possess excellent writing, speaking, and presentation skills
- Must be a problem solver and team player who can work independently, productively, and with minimal supervision
- Experience using Bluebeam, AutoCAD and Revit is helpful
- Working knowledge of various Microsoft Office tools (Word, Excel, PowerPoint)
- Be detail-oriented and organized while multitasking and shifting priorities easily
- Knowledge of existing and emerging technologies, along with integration capabilities of systems

Education and Experience:

- College-level education preferred; real world experience is a must have
- Design experience is a plus.
- Background should include audio system design, troubleshooting, DSP programming,
- Excellent communication skills
- Strong ability to summarize, communicate, and track activity status

About Sounds Rite:

Sounds Rite is a new and growing company dedicated to helping clients assess and resolve acoustic issues within the spaces they occupy. **Our relationships have been built over time and continue to grow through trust.**
